### **REASONS FOR ALLOWANCE**

Claims 1-15 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, prior art does not disclose or fairly suggest a method including the steps of obtaining integrated circuits as structures on a semiconductor substrate, wherein the structures on the semiconductor substrate are passivated, and establishing of a wavelength or a wavelength region of the X-radiation as a function of the thickness of the semiconductor substrate in such a way that transmission of the X-radiation through the semiconductor substrate is at least sufficient for detection of the X-radiation and for obtaining a high contrast image, in combination with all the limitations in the claim. Claims 2-11 are allowed by virtue of their dependency.

Regarding claim 12, prior art does not disclose or fairly suggest an imaging X-ray microscope including a specimen chamber for examining a specimen, wherein the specimen is an integrated circuit with structures formed on the semiconductor substrate and wherein the structures are passivated, and an X-radiation source generating X-radiation having a wavelength which is a function of the thickness of the semiconductor substrate, wherein the transmission of the X-radiation through the semiconductor substrate is at least sufficient for detection of the X-radiation and for obtaining a high-contrast image, in combination with all the limitations in the claim. Claims 13-15 are allowed by virtue of their dependency.
